

# Supplier Qualification Policy

Controlled policy POL-SQ-04 | Version 4.2

|              |                                                        |
|--------------|--------------------------------------------------------|
| OWNER        | Director Supplier Quality                              |
| EFFECTIVE    | 15 January 2026                                        |
| APPLIES TO   | Medicinal products, medical devices, critical services |
| REVIEW CYCLE | Annual                                                 |

## 1. Purpose

This policy defines risk-based due diligence and approval controls before a supplier may provide regulated products or services.

## 2. Risk classification

Suppliers of medicinal products, sterile devices, patient-facing services or controlled-temperature logistics are critical unless a documented assessment supports a lower class.

## 3. Mandatory evidence

For a distributor of medicinal products, a current GDP certificate is mandatory. A commercial register extract, insurance evidence, quality certification where applicable, signed privacy terms and contract are also required.

# Supplier Qualification Policy - controls

Continuation of POL-SQ-04 | Version 4.2

## 4. Identity reconciliation

The registered entity, contracting party, invoice entity, certificate holder and operational site must be reconciled. An alias is acceptable only with documented legal evidence.

## 5. Exceptions

A critical missing document cannot be waived by an automated model. A time-limited exception requires Quality and Legal approval, compensating controls and an expiry date.

## 6. Reassessment

Critical suppliers are reassessed annually and after a serious quality event, ownership change, material scope change or certificate suspension.

## Decision matrix

| Condition                          | Classification | Outcome                       |
|------------------------------------|----------------|-------------------------------|
| Critical required document missing | Critical       | Request information or reject |
| Identity conflict unresolved       | Major          | Request information           |
| All mandatory evidence valid       | Clear          | Eligible for approval         |

|              |                           |
