

Insurance Requirements

Controlled policy POL-RISK-02 | Version 2.0

OWNER	Enterprise Risk
EFFECTIVE	01 July 2026
APPLIES TO	Critical suppliers and logistics providers
CURRENCY	EUR

1. Minimum cover

A critical product supplier must maintain product liability cover of at least EUR 2,000,000 per occurrence and in the annual aggregate.

2. Evidence

The certificate must identify the insured legal entity, insurer, policy number, period, territorial scope, limits and material exclusions.

3. Validity

Cover must be valid at approval and for the planned service period. Renewal evidence is due 30 days before expiry.

Insurance Requirements - controls

Continuation of POL-RISK-02 | Version 2.0

4. Name matching

The insured legal entity must match the approved supplier or a documented group policy must explicitly extend cover to that entity.

5. Sub-limits

Recall and temperature-excursion sub-limits are evaluated against exposure. They do not replace the base product-liability minimum.

6. Exceptions

A shortfall requires documented Risk acceptance, an expiry date and mitigating commercial controls. Automated systems may flag but may not approve the exception.

Decision matrix

Supplier risk	Minimum	Exception authority
Critical product	EUR 2,000,000	Head of Risk and Legal
High service	EUR 1,000,000	Head of Risk
Standard	Risk assessed	Business owner

OWNER	Director Supplier Quality
