

Claim Settlement Value Standard

Synthetic policy fixture · Version 1.0 · effective 01 January 2026

1. Settlement value record

Every property claim file must record the claim settlement value in euro, being the total amount the insurer expects to pay to return the insured property to its pre-incident condition.

The claim settlement value is entered by the assessor while the claim file is prepared for a settlement decision.

2. Scope

This standard applies to every property claim assessed by the claims governance team.

Policy attribute	Recorded value
